**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-13, 32-34, drawn to detection of a characteristic of a communication channel, classified in class 370, subclass 343.
  - II. Claims 14-19, 35, drawn to setting a desired communication rate for the communication channel, classified in class 370, subclass 232.
  - III. Claims 20-21, drawn to configuring the communication line for transmission in FDM, and detecting changing line conditions, classified in class 370, subclass 286.
  - IV. Claims 22-25, drawn to comparison a line length of the communication channel to a threshold, classified in class 370, subclass 251.
  - V. Claims 26-27, 29, drawn to receiving a mode priority and frequency region list, determining characteristic of the communication channel, classified in class 370, subclass 328.
  - VI. Claims 28, 30-31, drawn to determining a capacity for a plurality of different frequency regions of the communication channel, classified in class 370, subclass 468.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I- VI are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be

Art Unit: 2666

separately usable. In the instant case, invention I-VI has separate utility such as determination above. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II-V, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
